

7.3

Ganjier Exam Sample C

12/17/2021, 2:03:07 PM

Batch	N/a
Brand	N/a
Location	N/a
Harvest Date	Fri, 17 Dec 2021 08:00:00 GMT
Packing Date	Fri, 17 Dec 2021 08:00:00 GMT

Nutrients	,Not Available
Light Source	Not Available
Chemotype	Type I
Lab Test Provided	No
Standards Certification	No
Geographical Indication	N/a

Appearance 7.4

Contaminants Observed	Yes
Level of Coverage	Light
Type of Contaminant	INSECT(S)
Trichrome Density	Moderate
Intact Trichromes	Most
Structure	Loose
Trim	6
Flower Maturity	9.1
Cure	7.5
Tactile	7.1
Uniqueness	Common
Notes	A little too sticky of texture brought the cure down just a bit from 8 to 7.5. Seemed like it needs just a wee bit longer, but almost the bullseye. Put traits as "common" because, again, most Cannabis I grow looks like this. Also, I have seen purple buds and I have seen loose buds. I have seen under-trimmed buds. Nothing quite sticks out.

Aroma 7.7

Clean/Off	CLEAN
Intensity	7.7
Complexity	7
Age / Storage	8.5
Prevalent Aromas	FRUIT,FLORAL
Essence	CLEAN
Uniqueness	Common
Notes	IS THIS FORBIDDEN FRUIT!? IT SMELLS SO MUCH LIKE FORBIDDEN FRUIT. I put "common" because I regularly grow a variety with THIS EXACT TERPENE PROFILE! Also, there are several varieties that come close to this aroma, although not quite as beautifully expressed.

Flavor 6.8

Dry Hit	6.4
Body	Moderate
Intensity	7.5
Complexity	6.2
Longevity	6.9
Smoothness	7.2
Tastes Like	Guava, lavender, and at the very end (like almost all cannabis) that perfume taste.
Uniqueness	Common
Notes	Dry hit was only guava and orange notes. Floral notes seem to be absent. Initial hits are EXTREMELY fruity. About one third through, floral notes become a little more present. Though my favorite flavor, I have it all of the time. Also, many Cannabis eighths for sale that I have seen have this aroma. I'd say common. +0.5 to smoothness because I wanted to smoke this thing down to the half centimeter. I use 30 mins as sustained. At 23 minutes, I can no longer tell of the flavor is psychosomatic or not. So I am leaving it shy of sustained.

Experience 10.0

Physical Effect Type	Stimulating
Mental Effect Type	Balanced
Onset	Rapid
Intensity	STRONG
Duration	SUSTAINED
After Effect	BALANCED
Uniqueness	Uncommon
Notes	5 minutes in and life is beautiful and "Kickstart My Heart" sounds CRISP. I am way too familiar with this terpene profile and I love it. Music is amazing, all of the parts of it are so pronounced, I want to sing and dance, life is so wonderful. Holy crap this is absurdly healing right now by this nice little river. On the one hand, I know exactly what to expect from this terpene profile, and I encounter it often, so, common. But, bajeezus. Singing and dancing by this gorgeous clear river on this magically crisp cloudless day... TAKING A TEST NO LESS, THE ONLY TEST I'VE CARED ABOUT IN OVER A DECADE, like how can this not be a 10? Hard to tell if Cannabis or not, admittedly. But, I am letting this Cannabis do its thing and having a top tier magical experience. ... my compromise to account for this obvious bias is to mark the experience as "Uncommon" rather than rare. One hour in, still feeling like gold, which is my benchmark for sustained. Again, though, this is totally MY terpene profile
